

XR-200 Sensor Hub Datasheet

Revision 1.2

1. Electrical characteristics

Supply voltage VDD: 1.8 V to 3.6 V. Typical operating current 450 μ A.

2. I2C interface

The 7-bit I2C slave address is 0x2C when the ADDR pin is tied low, and 0x2D when ADDR is tied high. Fast-mode up to 400 kHz is supported.

3. Register map

Register	Address	Reset
WHO_AM_I	0x0F	0xB2
CTRL1	0x20	0x00

Read WHO_AM_I after power-up; it returns 0xB2.
